CICALA

Sand cleaning machine CICALA

The CICALA sand cleaning machine is a special hand-held machine that was further developed in 2017.

The CICALA model was designed to meet the special requirements for cleaning sandpits and sand on playground equipment. Due to its small dimensions, the machine fits through gates (larger than 88 cm) and can move very nimbly on the smallest sand pitches. The machine is equipped with a 5.8 HP Honda 200 cc engine, which drives a hydraulic pump and two oil motors. Thanks to the hydrostatic drive, the essential areas of the machine are wear-free and low-maintenance.

Special features of the CICALA are: powerful traction, good handling, stepless forward and reverse travel, as well as separate drives for driving and screening deck.

Model CICALA 5,8 HP

- 70 cm working width
- working depth approx. 0 - 18 cm
- work capacity approx. : 2.800 qm/h
- length: approx. 1900 mm, width; 880 mm, height 1000 mm
- weight approx.: 252 kg
- Motor Honda GP 200, 5,8 PS 4T Euro 2 with Hydrostatic
- stepless hydraulic forward and reverse drive
- incl. three step sieves (5x5 mm / 10x10 mm / 15x15 mm)
- all frame parts hot-dip galvanized and partly powder-coated
- including CE certificate, including operating instructions in English
- 2-year manufacturer's guarantee on spare parts, excl. wearing parts
